

Investor Behavior & Funding Impact Analysis Report

1. Sum of Investor_Count by Name

- **Insight:** This bar chart ranks startups based on how many investors have backed them.
- **Top Startup:** *Bryston, Anthem,...* with the highest investor count.
- **Implication:** Higher investor count suggests stronger market confidence and possibly diversified funding strategies.

2. KPI Metrics Summary

Sum of Investor_Count	Sum of Repeat_Investor_Flag	Sum of...
201K	392	755.82M

- **Sum of Investor Count: 201K**
 - Total number of investors across all startups analyzed.

- **Sum of Repeat Investor Flag: 392**
 - Number of investors who have funded multiple startups, indicating experienced or active investors.
- **Sum of Funding Total (USD): \$755.82M**
 - Total investment made by all investors across the dataset.

3. Sum of Funding_Total_Usd by Investor_Type and Category_Code

- **Insight:** Distribution of total funding by investor types (Angel, Private Equity, VC, etc.) and industries (advertising, analytics, automotive, etc.).
- **Observation:**
 - *Private Equity* and *Venture Capital* dominate total funding, particularly in high-growth industries like analytics and automotive.

4. Sum of Years_to_Exit by Investor_Type

- **Insight:** Shows the total (or average) time to exit (e.g., acquisition, IPO) based on the investor type.
- **Observation:** "Other" investor types show unusually high or negative values, suggesting potential data inconsistencies or the influence of outliers.

5. Startup Success Rate (%) vs Avg_Funding_Per_Investor

- **Insight:** Scatter plot illustrating how average funding per investor correlates with startup success rates.
- **Observation:** Despite high average funding (~\$0.8B), the success rate appears low (between 0.04% - 0.07%), indicating that high capital alone does not guarantee success.

6. Investor_Type Summary Table

< Back to report															
Investor_Type	0	advertising	analytics	automotive	biotech	cleantech	consulting	design	ecommerce	education	enterprise	fashion	finance	games_video	hardware
Angel	1										1				
Other	2893	336	42	9	702	171	156	4	296	36	461	14	62	371	290
Private Equity	2						1				1				
Venture Capital	5													2	
Total	2901	336	42	9	702	171	157	4	296	36	463	14	62	373	290

- **Insight:** Provides a breakdown of how many investors belong to each type and their contributions in various industry categories.

- **Data:**

- *Other*: 2,893 investors dominate in numbers.
- *Venture Capital*: Only 5 recorded, but significant in influence.
- *Private Equity*: 2 investors.
- *Angel*: 1 recorded investor.

7. Sum of Growth_Score by Name (Treemap)

- **Insight:** Visual comparison of startups based on their overall growth scores.
- **Top Performers:**
 - *Clearwire*
 - *Verizon Communications*
 - *sigmacare*
 - *Facebook, Solyndra, Twitter, and others.*
- **Implication:** These companies show strong business performance, user acquisition, or revenue expansion.

8. Region and Name (Map View)

- **Insight:** Geographic distribution of startups and their investor activities.
- **Observation:** High investor concentration in regions of Europe (highlighted countries), indicating regional startup hubs.

9. Filters

Category_... All	Status All	Funding_Total_Usd 0 5700000000	Investor_Type All
Exit_Proba... All	Regi... All		Year, Quarter, M... All

These allow dynamic slicing of the dashboard for deeper analysis:

- **Category_Code:** Filter by sector (e.g., analytics, automotive).
- **Status:** Startup lifecycle (operating, acquired, etc.).
- **Exit_Probability:** Chance of exit (acquisition, IPO).

- **Region:** Geographical filter.
 - **Funding_Total_Usd:** Investment amount range slider.
 - **Investor_Type:** VC, PE, Angel, etc.
 - **Time-based filter:** Filter by year, quarter, or month.
-

Key Takeaways

- **Investor Trends:** While most investors are categorized as "Other," VC and PE firms dominate in terms of financial influence.
- **Startup Performance:** Few companies have both high growth scores and repeat investor backing, indicating consistent performance.
- **Funding Efficiency:** Despite large investments, overall startup success rates remain modest, suggesting room for improved funding strategies.
- **Regional Patterns:** European startups attract significant investor attention, possibly due to innovation hubs or favorable ecosystems.
